## » APPLICATION

Duct sensor for measurement of air temperature and other gaseous mediums for HVAC applications (e.g. supply and exhaust ducts).

## » TYPES AVAILABLE

### Duct/Immersion sensor temperature – passive

KFK03.xxx.08 Sensor

### Duct/Immersion sensor temperature – active TRV 0..10 V | TRA 4..20 mA

KFK03.xxx.08 TRV  
KFK03.xxx.08 TRA

\* e.g.: PT100, PT1000, NI1000, NI1000TK5000, LM235Z, NTC..., PTC... for other sensors please request.

\*\* mounting length: 100 mm, 150 mm, 200 mm, 250 mm

## » SECURITY ADVICE – CAUTION

The installation and assembly of electrical equipment should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
- Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

## » NOTES ON DISPOSAL

As a component of a large-scale fixed installation, Thermokon products are intended to be used permanently as part of a building or a structure at a pre-defined and dedicated location, hence the Waste Electrical and Electronic Act (WEEE) is not applicable. However, most of the products may contain valuable materials that should be recycled and not disposed of as domestic waste. Please note the relevant regulations for local disposal.

Ambient condition	max. 85% rH short term condensation		

## » PRODUCT TESTING AND CERTIFICATION

### Declaration of conformity

The declaration of conformity of the products can be found on our website <https://www.thermokon.de/>.

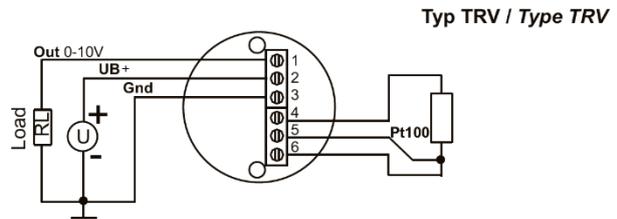

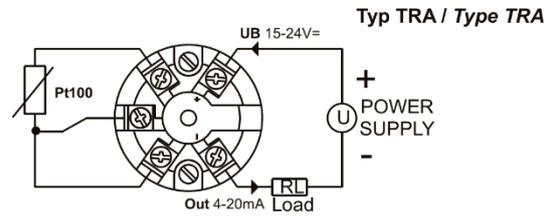

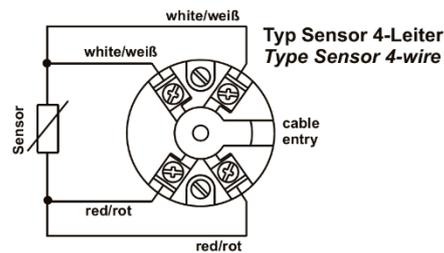

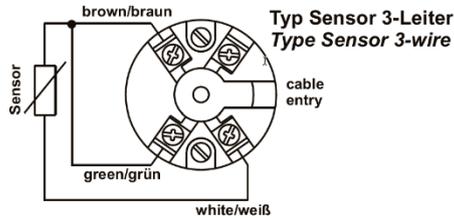

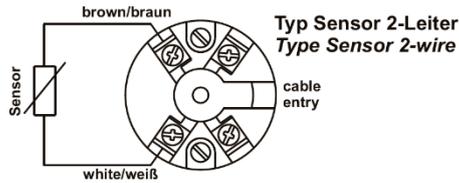

## » MOUNTING ADVICES

The sensor can be mounted on the ventilation duct by means of a mounting flange. For risk of condensate permeation in the sensor tube respectively in the immersion pocket the bushing must be installed in a position that occurred condensate can run off. Mounting with immersion pocket for usage in liquid media. Use contact fluid for better heat transfer between sensor and measuring medium.

**Attention:**

With digital sensors such as **AD592, SMT160, LM235, DS1820** the following applies: brown = plus (+), white = minus (-), green=out
